DESCRIPTION

The Cortek Quasar is a high-performance HDMI V2.0 cable. Every detail has been carefully studied to be at the top of the category: the golden and high quality connectors are protected by shells in metallic material with the Cortek logo, the cable is entirely in pure copper (BC) and in the specifications of 30AWG (1.8m), 28AWG (5 meters) and 26AWG (10 meters) to maintain the signal according to the length of the cable, so as to ensure compatibility 2.0. Even the cable cover is of the highest level, it is in fact crystallized nylon.
